

## The 30-second tour

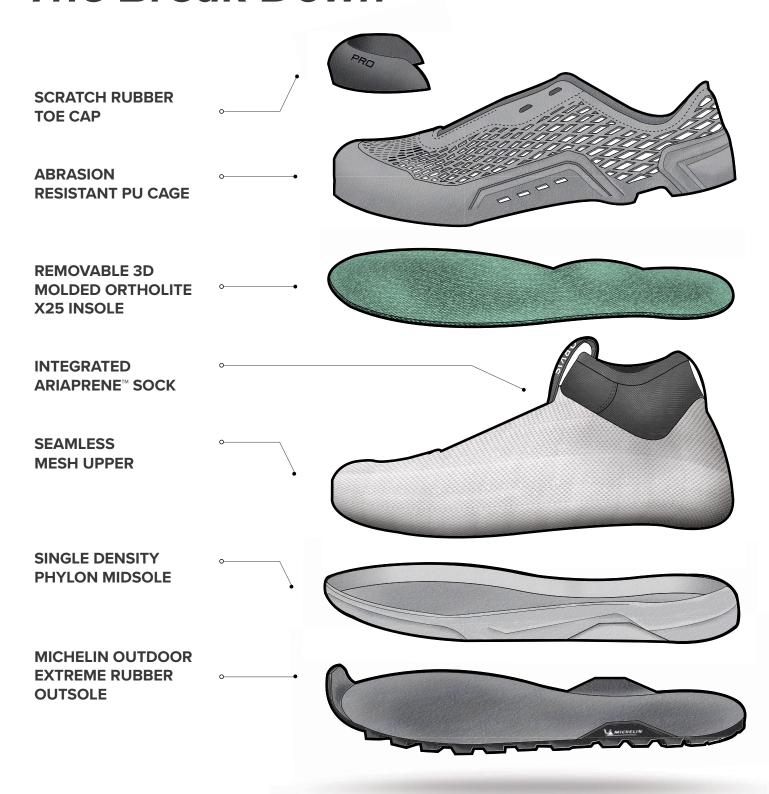

- Built for long hikes, wet wading and the boat
- **Seamless mesh upper** with PU Cage provides optimal drainage, weight and durability
- Integrated Ariaprene<sup>™</sup> sock prevents debris from entering the shoe
- Michelin® Outdoors Extreme rubber outsole provides best in class rubber traction
- Removable 3D molded Ortholite® X25 insole for ultimate support and comfort
- Protected laces prevent unnecessary snags and abrasion
- Integrated lace hood allows laces to easily tuck away

## CONSTRUCTED WITH A SEAMLESS QUICK DRAINING MESH UPPER

covered in an abrasion resistant PU Cage and scratch rubber around the toe cap, the PRO Approach shoe is designed with optimal drainage, weight and durability in mind. A Michelin Outdoor Extreme rubber outsole provides 43% better wet traction when navigating river rock and slippery trail conditions. An integrated Ariaprene sock prevents debris from entering the shoe while providing mid-ankle support. Protected lace eyelets and integrated lace hood stows laces up and out of the way for less snags in brushy conditions. The Orvis PRO Approach shoe is intended to perform on the river, down the trail and on the boat while not looking out of place walking into the bar after a long day on the water.

WEIGHT	<b>50</b> oz	<b>23</b> oz

## Reports from the field

"I thought the neoprene cuffs would be uncomfortable, but they are not. The cuffs do a great job keeping sand and small gravel out of the shoe, which has been an issue with any other water shoe I've owned."

Ethan Nickel - Makenzie River Guides

\*\*\*\*

"It was surprisingly good on slippery rocks. As good or better than any other rubber sole, I have used and I was fishing with a couple people who had studded rubber and I was as secure on the bottom as they were"

Tom Rosenbauer

\*\*\*\*

"The perfect shoe for around camp, in a drift boat, to and from the river and wet wading in rivers."

Darcy Toner – faceless Fly Fishing
